

Repair • Retrofit • Rehab

Wouldn't it be great if there was a company who did it all?

Wouldn't it be great if there was a company that could solve your transportation concerns with one stop under one roof?

A company whose expertise included: Emission solutions • Repowers • Natural Gas conversions • Hybrid conversions

ADA compliance including: Wheelchair lift installations • Ramp retrofits, reconditioning & Repair • Wheelchair lift reconditioning & repair • Seat belt & restraint solutions

Electrical solutions including: Multiplexing • Smart Bus Integration • LED & Digital Sign Systems • AVL & Self Annunciating Bus systems • Fire & Methane Detection • Fire Suppression Systems • HVAC system repair, maintenance & upgrades

Complete Bus Remanufacturing & Reconditioning including: Paint & Body work • Accident & major collision repair • Fire restoration & repair

Wouldn't it be great if this same company offered full services for your rail side as well?

Interior rehab & reconditioning • Locomotive repair & reconditioning • Accident repair • HVAC system repair maintenance & upgrades • Wheelchair Ramp & Lift installations • Wheelchair lift/ramp maintenance & repair • Truck & wheel motor repair & reconditioning

...for over 20 years the experts at CCW have provided Peace & Mind to thousands of customers by being their one stop shop.

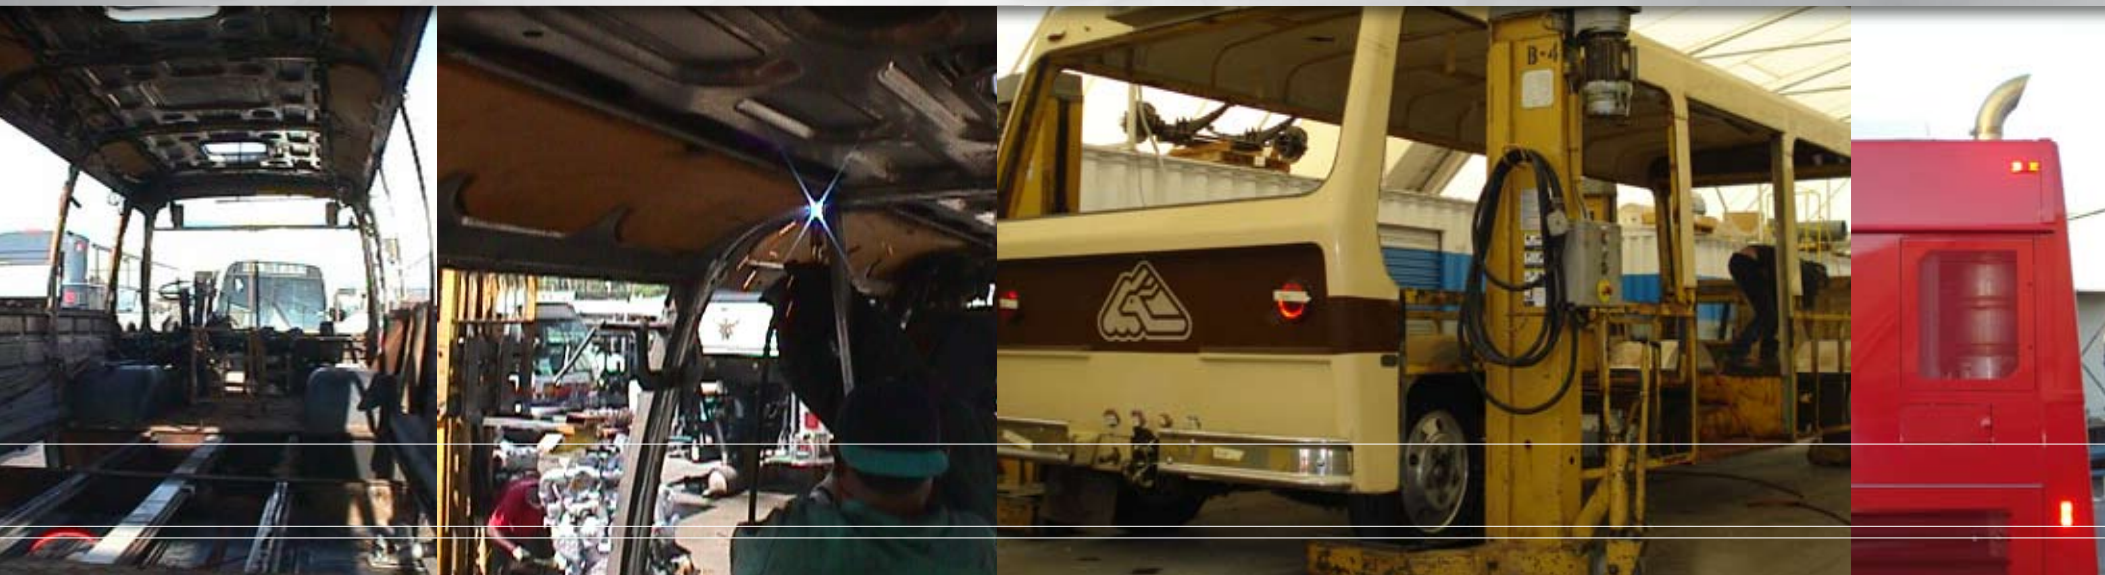

Finding everything in one spot has never been easier!

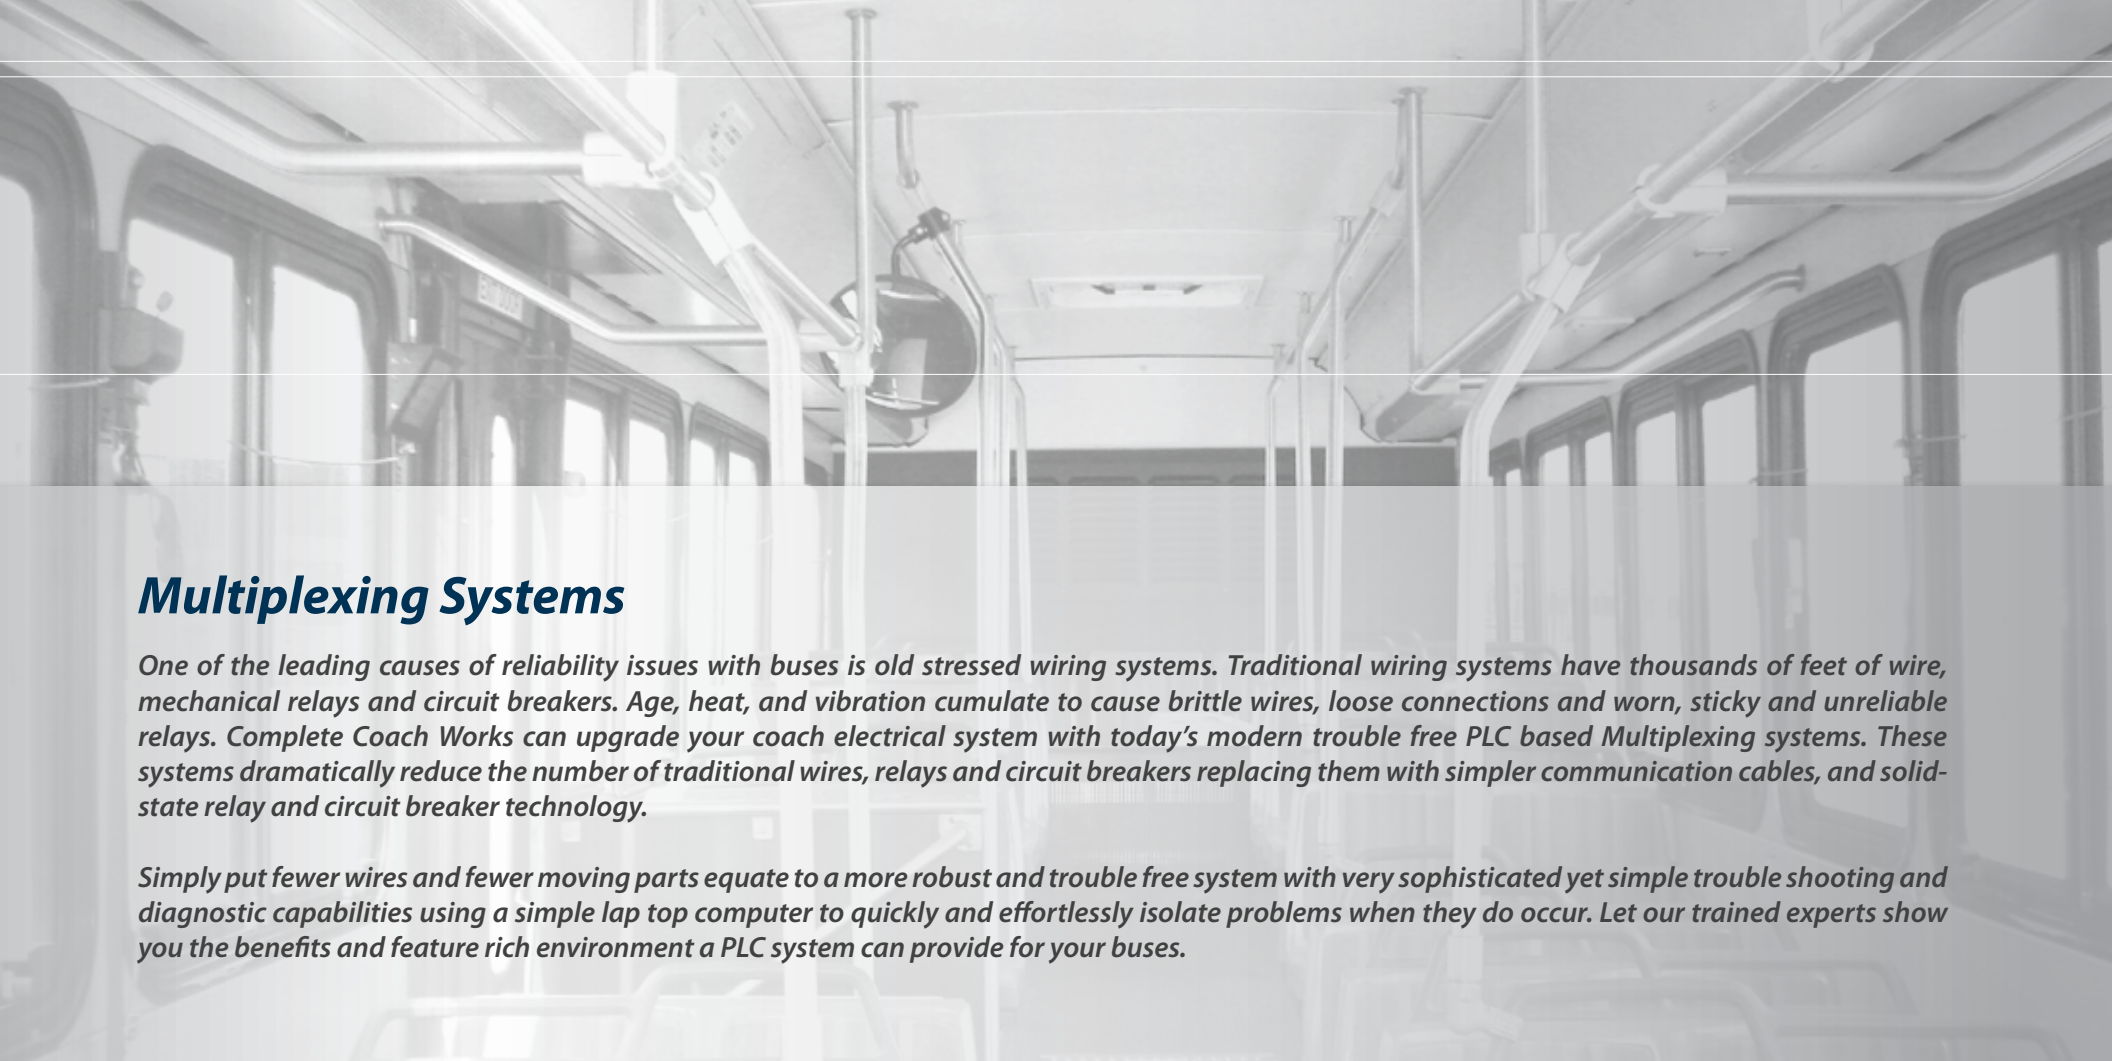

Remanufacturing

Our team of experts will bring your coach up to spec with today's demanding new standards, from drive train upgrades that meet today's stringent EPA or State and Local Emission standards to ADA complaint accessibility, GPS Systems for Automated Vehicle Location systems, to full Multiplexing PLC based systems. A completely remanufactured bus from Complete Coach Works will save you hundreds of thousands of dollars while providing your customers a bus with the look, feel and performance of a new bus with today's technology seamlessly integrated.

Emission Compliance

Did you know emission compliance can come in many forms and avenues? Let the team of experts at Complete Coach Works show you the many options available to meet your fleet's specific needs and engineer a solution customized for you. Many times an inexpensive retrofit using particulate traps will bring your fleet into compliance, or a simple repower to a clean diesel burning current technology diesel engine will do the job. Complete Coach Works maintains a team of experts on emission compliance and we can work with you to develop a cost effective approach to emission compliance.

Multiplexing Systems

One of the leading causes of reliability issues with buses is old stressed wiring systems. Traditional wiring systems have thousands of feet of wire, mechanical relays and circuit breakers. Age, heat, and vibration cumulate to cause brittle wires, loose connections and worn, sticky and unreliable relays. Complete Coach Works can upgrade your coach electrical system with today's modern trouble free PLC based Multiplexing systems. These systems dramatically reduce the number of traditional wires, relays and circuit breakers replacing them with simpler communication cables, and solid-state relay and circuit breaker technology.

Simply put fewer wires and fewer moving parts equate to a more robust and trouble free system with very sophisticated yet simple trouble shooting and diagnostic capabilities using a simple lap top computer to quickly and effortlessly isolate problems when they do occur. Let our trained experts show you the benefits and feature rich environment a PLC system can provide for your buses.

Wheelchair Lift Installations

Our ground breaking work for fleets as diverse as Greyhound, Coach USA, Americanos and transit fleets from Coast to Coast has included our innovative sliding door designed to minimize disruption to seated passengers, shorten dwell times and simplify the entire lift and passenger loading procedure for the bus operator. Completed installations leave the interior looking professional and of OEM quality, all interlocks and safety systems work seamlessly with the bus mechanical and electrical subsystems and the finished retrofit looks factory new.

Repowers

Many older buses can be revitalized with a simple repower or fuel conversion to either alternative fuels or Hybrid Drive Systems allowing emission compliance while in many cases, taking advantage of lower fuel costs available when using Natural Gas or Gasoline with modern Hybrid Drive Systems

...finally you can relax.

Collision & Fire Repair

Don't take chances leaving your bus repairs in the hands of untrained body shops. Your transit vehicles are expensive assets and buses are unique vehicles with sophisticated air brake systems, air operated door systems, PLC and Multiplexed control systems, complex wheelchair platform or lift systems and highly sophisticated HVAC systems. When a bus is involved in an accident or fire, one or more of these systems will need repair in addition to the structural and bodywork. Complete Coach Works' technicians have the specialized training, OEM qualifications and specialized tooling to properly diagnose and repair these systems. Our expertise will assure you that your bus will come back completely and properly repaired and ready for revenue service.

Our industry experts deliver
the best results. Everyday.

Rail Collision Repair & Rehabs

Working in the most demanding environments, honing their skills with dedication, hard work, and years of experience, Complete Coach Works team of dedicated rail technicians bring you expert craftsmanship, and technical expertise to quickly tackle your most demanding requirements.

Whether your need is for Locomotive accident repair and mechanical rehab, or passenger car repair or reconditioning. Maybe its time to revamp that old inefficient HVAC system or tune it up, and get it ready for summer. Regardless of how small or large your job our team is ready to provide solutions.

Over the years we have remanufactured trucks systems, completely overhauled and redesigned HVAC systems converting old inefficient and costly reciprocating compressors with efficient cost effective scroll type units, increasing HVAC efficiency while reducing weight, vibration and noise. Our team has designed specialized bicycle racks to allow riders the ability to stow their bikes vertically on rail cars, we have designed sunshade systems, wheelchair lift retrofits, and retrofitted windows.

Let us put our strengths to work for you today.

Go Green, Save The Environment, Save Fuel, Save Money.

Alternative Fuel Conversions & Hybrid Propulsion systems

When it comes to Green Technology Complete Coach Work has expertise that spans multiple transportation modes, from buses to utility and dump trucks, from waste disposal to off road equipment, our team of experts at Complete Coach Works can show you the many options available to meet your fleet's specific needs and engineer a solution customized for you. Many older buses can be revitalized with a simple repower or fuel conversion to either alternative fuels or Hybrid Drive Systems allowing emission compliance while in many cases, taking advantage of lower fuel costs available when using Natural Gas or Gasoline with modern Hybrid Drive Systems.

Or you may be one of many fleets that can benefit from an inexpensive retrofit using particulate traps to bring your fleet into compliance. And in many States a simple repower to a current technology clean diesel engine will do the job. Complete Coach Works maintains a team of experts on emission compliance and we can work with you to develop a cost effective approach to emission compliance.

How many companies can boast over one million parts in inventory?

World Class Parts Support

We stock literally millions of parts, both new, uses and surplus. Now matter your bus year make or model, chances are we have the parts in stock and our purchasing prowess allows us to pass big savings on to you. Before you waste multiple phone calls and countless hours on the phone give our experts a call first. You'll love the savings and the prompt efficient service will have you coming back for more.
